

Full service for the life of your tires!

FREE FLAT REPAIR: All our passenger and light truck tires come with free flat repair coverage. If you get a repairable flat tire any time during the life of your tires we will complete a permanent “inside-the-tire” repair that includes the change and rebalance of the tire. (Provided at Northern Tire)

LIFETIME ROTATION AND BALANCE CHECK: We have always included the first tire rotation and rebalance at no charge in an effort to ensure the tires are wearing properly from the start. We recently expanded this to include all tire rotations for the life of your tires. Tires go out of balance over time and very often a vibration will develop after rotating tires. To combat this problem we now also check the balance of your tires at no charge when we do a rotation. If your tires are out of balance we will offer you the option of balancing at that time.

LIFETIME ALIGNMENT CHECK: When a vehicle is out of alignment the tires can often be heading in two different directions. When this happens the tires are always fighting against each other causing rapid tire wear on dry roads, decreased traction on slippery roads and a decrease in fuel mileage. Our alignment equipment is the latest technology that utilizes high speed digital 3D cameras. We offer to you no charge alignment checks for the life of your tires. Unsure if your vehicle is still aligned, just ask, we will check.

FREE AIR PRESSURE CHECKS: Tire pressures are a leading cause of rapid tire wear and decreased fuel mileage. We will check your pressures for you any time.

***NITROGEN INFLATION:** Optional - We will inflate your new tires with nitrogen. Nitrogen is a larger, more stable air molecule that keeps your tire pressure more consistent and eliminates oxidation of your tires and wheels. Nitrogen inflated reduces false alarms of tire pressure monitoring systems, increased fuel mileage and increases tire life. Nitrogen inflation - \$5 per tire.

****Nitrogen Plus:** Optional - One year additional tire protection program.

- >Unlimited nitrogen for one year – includes multiple sets of tires for the same vehicle. (\$20-\$60 value)
- >Reimbursement of repairs not done by Northern Tire and/or replacement of unrepairable tires. (\$200 value)
- > 24 hour towing and roadside assistance – reimbursement of any needed roadside assistance. (\$300 value)

Nitrogen Plus Program \$49 – renewable after one year.

It is our goal to make your tires last as long as possible. Northern Tire employees are trained to look for anything that could lead to decreased tire wear and pass that information on to you.
