2019 CHEVY 1500 TRAIL BOSS 4WD & GMC 1500 AT4 4WD **1.5" BALL JOINT UCA LIFT KITS**

PRODUCT OVERVIEW

Designed specifically for Trail Boss and AT4 owners that want a little more ride height out of their truck for clearance of full size 33/1250R 18 inch or 20 inch tires, this lift kit is the ticket.

Fabtech's Upper Control Arm lift kit provides a 1.5" increased ride height on Trail Boss and AT4 models without creating suspension bind at full droop. These vehicles have a factory 2" lift. With the addition of this 1.5" lift kit, the vehicle will sit as high as a standard model with a 3.5" lift kit and clear a 33" tall tire.

Lift is accomplished with an aluminum spacer at the top and a small preload spacer under the coil of the factory Coilover shock. This positions the Coilover properly to provide height without coil bind or over extending the travel that can lead to damaged suspension parts in the future.

The tubular Upper Control Arms with heavy duty ball joints address the geometry of the front suspension with the new ride height for proper alignability. Due to the new GM suspension geometry of the 2019, there are no differential drop brackets required for the CV axles to operate properly.

Rear lift comes from 1" blocks and u-bolts. Some owners may opt to not install the rear blocks if they desire to level the stance of the vehicle.

Rear shock options include Performance, Stealth or Dirt Logic shocks.

INSTALL & TECH

- Install Time - 2-3 Hours
- Holes to Drill - 0
- Welding Required - No
- Cutting Required - Yes
- Driveshaft Modification - No

TIRE & WHEEL SIZES

33/12.50R18 tires w/ 18x9 wheels w/ 5" BS w/ minor trimming
 295/65R18 tires w/ 18x9 wheels w/ 5" BS w/ minor trimming
 33/12.50R20 tires w/ 20x9 wheels w/ 5" BS w/ minor trimming
 295/55R20 tires w/ 20x9 wheels w/ 5" BS w/ minor trimming

1.5" BALL JOINT UCA LIFT KIT W/REAR PERFORMANCE SHOCKS - K1152 (14)(79)(197)
