Steptoe, WA
Vector 300
Agriculture, Hillside Spraying
Alliance 550 MultiUse (710/70R42)
(181A8/177D)

Klaveano Brothers Farms operate out of Steptoe, WA, an area known for steep slopes and hillside agricultural operations.

Nate Klaveano purchased his Vector 300 sprayer equipped with 710/70R42 Alliance 550 MULTIUSE tires after a recommendation from their equipment dealer. Ag Trucks and Equipment, headquartered in Great Falls, MT has been outfitting new Vector sprayers with the Alliance 550. Salesmen Justin Honcoop prefers the Alliance in these areas saying "for the hilly terrain in Steptoe, WA, we found the Alliance 550 Multiuse to be the best solution on the market. Mounted on a Vector 300 sprayer, the Alliance 550 is providing greater stability, road-ability, and grip." Klaveano Brothers Farms plans to convert their combines over to the

Alliance 550 Multiuse pattern for use in the same hilly conditions.

Dustin Link, the operator of the Vector 300, has reported excellent results from the Alliance 550: "In the field there is less crop damage on corners, less soil compaction, and better side-hill traction, (vs. standard R1 pattern). The 550 climbs hills just as well as a standard bar tread which is important in this area. The berm is smaller than any R1, it would be the same size you'd expect from a track machine. We road this machine about 25% of the time, the ride feels like a pick-up truck even at top speeds (size 710/70R42 as seen below is speed rated for 40mph). We get much better wear with the 550; roading destroyed bar tread tires on the same machine with cracking and scalloping wear."

TIRE SIZES AND SPECIFICATIONS

SIZE	SKU	PR	SEE YOUR LOCAL REPRESENTATIVE FOR TECHNICAL INFORMATION	
11.2-24	76800002	6 PR	TUBELESS	
14.9-24	76800012	8 PR	TUBELESS
